

AHMAD NADEEM

MERN STACK DEVELOPER

Multan, Pakistan | contact.dev.ahmad@gmail.com | +92 305 4474602

Portfolio Website: ahmadnadeemx.vercel.app | Github: github.com/ahmadnadeemx

SUMMARY

Full-stack MERN developer with **3+ years of experience** shipping SaaS platforms, fintech tools, and e-commerce systems end to end, from database schema to deployed UI. Currently lead SaaS development at Hat Tech Media, working on authentication, real-time features, and subscription billing. Have built and shipped 10+ production applications across React, Node.js, MongoDB, and PostgreSQL, with hands-on experience using AWS Cognito for authentication and access control. Use Claude Code and Cursor daily to move faster on boilerplate, but review and understand every line before it ships.

SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), Redux, Zustand, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, REST APIs, WebSockets, JWT, OAuth 2.0

Databases: MongoDB, PostgreSQL, Mongoose

Cloud and DevOps: AWS Cognito, Git, GitHub, Vercel, Render

AI-Augmented Workflow: Claude Code, Cursor

Other: Postman, Payment Gateways, Performance Optimization

PROFESSIONAL EXPERIENCE

Senior MERN Developer, Hat Tech Media

Jan 2025 - Present

- Lead development of **SaaS products**, owning **architecture decisions** for authentication, billing, and real-time features.
- Built secure authentication and role-based access systems using **AWS Cognito** and JWT.
- Developed real-time features with **WebSockets** and **optimized API/database** performance.
- Integrated **payment gateways** and subscription billing workflows.
- Use Claude Code and Cursor to handle boilerplate, reviewing every line before it ships to keep bugs out of production.

MERN Stack Developer, IES Marketing

Aug 2024 - Jan 2025

- Built **accounting software and a CRM** for a real estate company, covering invoicing, payroll, and financial reporting.
- Replaced spreadsheet based portfolio tracking with real-time analytics dashboards, giving property managers direct visibility into performance.

MERN Stack Developer, Hashtag Web

Nov 2023 - Aug 2024

- **Built e-commerce frontends** and integrated **REST APIs** for client projects using React and Tailwind CSS.
- Managed application state across dynamic, multi-step user flows for client facing products.

FEATURED PROJECTS

Learn Sphere - Multi-Tenant SaaS LMS | *React, Next.js, Node.js, MongoDB, Stripe*

- Built a four-app training platform with a course builder, chapter based quizzes, and certificate PDFs that match what students see on screen.
- Implemented Stripe billing with trial periods and server side proration handling for subscription management.
- Live Demo: learnspherelms.vercel.app

PropertyLedger - Real Estate Accounting Platform | *React, Node.js, Express, MongoDB, Vite*

- Built accounting software for a real estate resale business, tracking earnings, outstanding payments, and payroll across multiple parties.
- Built a custom virtual scrolling solution for large ledger views after evaluating that no off the shelf library handled the scale well.
- Live Demo: propertyledger.vercel.app

Cryptora - Self Hosted Password Manager | *React, Node.js, MongoDB, AES-256-GCM, JWT*

- Built field-level AES-256-GCM encryption with real-time session management, letting users view and remotely kill any logged-in device instantly.
- Migrated the entire encryption scheme in production with zero downtime, following a third-party security audit.
- Live Demo: cryptora1.vercel.app
